

IDD Rotation							
Objectives:							
To become familiar and comfortable communicating with non-verbal patients of a wide neurotypal diversity.							
To learn how to create a robust differential diagnosis for agitation in a non-verbal patient.							
To learn strategies for helping IDD patients thrive in outpatient clinic setting, including desensitization strategies.							
To observe oral sedation protocol in our dental clinic.							
To learn how to minimize psychiatric overmedication in the care of IDD patients.							
To understand the complexity of relationships in the care of dependent adults with IDD (caregivers, families, regional center, day programs, schools, etc.)							
To learn how to access community resources in the care of IDD patients.							
To work on a special project related to a topic on patients with neurodevelopmental disorders during unscheduled clinic time.
